VISITING CARD

Apie save | About Myself

Šiandien esu mokytojas, o kartais mentorius. Turbūt jais ir išliksiu. Be savo tiesioginio mylimo darbo, beveik kasdien mėgaujuosi kolekcionavimu. Tad su nekantrumu leiskite jums pristatyti savo pomėgį, – knygų skirtukų kolekciją, aprašomojo pobūdžio ir suklasifikuotą.

Today I am a teacher and sometimes a mentor. I will probably remain them. In addition to my work that I immediately love, I enjoy collecting almost every day. So it is with great anticipation that I present to you my hobby, a collection of book tabs, both descriptive and classified.

Požiūris / View

Svarbu tai, kad mes skatiname jaunus žmones tyrinėti mūsų įpročius ir tradicijas bei juos patobulinti. Nuolatinis eksperimentinis požiūris į viską – štai ko mums reikia. Įvairių problemų sprendimai atsiranda vos ne stebuklingai.

What is *important* is that we encourage young people to explore and improve our habits and traditions. A constant experimental approach to everything is what we need. Solutions to various problems appear almost miraculously.
